- 1 The grain loading booklet is to be placed on board the vessel and if so required, it is to be produced for inspection by the appropriate authorities at ports of loading.
- 2 The master is to be guided by the instructions and arrangements set forth in this grain loading booklet.
- 3 In the event grain loadings other than those specifically set forth in the grain loading calculation given in the booklet are contemplated, the master is to satisfy himself by the use of the heeling moment curves or tables, allowable heeling moment tables and other data contained therein, that the vessel's angle of heel, the net or residual area in the statical stability diagram and metacentric height, at any stage in the voyage, fall within the limitations set forth in International Grain Code (IMO Res. MSC. 23(59)).
